Panasonic: Setting the Standard for Social Housing

heating & cooling solutions

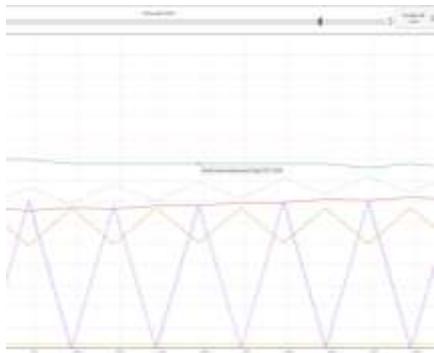

Konosuke Matsushita

Founder of Panasonic Corporation
Basic Management Objective, 1929

“Recognizing our responsibility as industrialists, we will dedicate our business activities to the progress and development of society and the well-being of people, thus improving the quality of life worldwide.”

Together Housing Working in Partnership – Data driven studies

Benefits of our units & Service Cloud

- Monitoring of up to 71 parameters
- Panasonic Aquarea J Series 5, 7 and 9kW are pre-approved for Connect & Notify
- Diagnostics package option
 - 7-day average COP
 - Proactive heat pump diagnostics & repairs

Award winning new build site Lily Close

- Education days
- First Commissioning
- Resident Engagement events

Energy House 2.0

- Key focus is to identify which technologies provide the best solution in both performance / ESG and reporting back their findings to the UK government to help write future regulations.
- Collaborative R&D initiatives
- Validate performance in realistic UK housing scenarios
- Strategic partnerships with academia and developers

(t_{dp} 35°C)

reddot design award

**J Generation
Monobloc**

**L Generation – Bi-Bloc & All in
One**

M Generation

Installation requirements:

- Can be used with any Aquarea A2W Heat Pumps
- All Pipe work needs to be fully insulated to avoid a build-up of moisture in Cooling mode.
- Each radiator will require a condense pipe
- Each radiator will need to be wired using a Fuse spur

Available in 3 variations:

Floor
Standing

Wall
mounted

Ducted

All temperature curves and capacity are available on Panasonic PRO Club

A discreet AC system all within an elegant indoor unit

Model	16	20	25	30
Refrigerant	R290	R32	R32	R32
Cooling capacity ¹ (kW) Nominal / Max	1,73 / 2,35	2,09 / 2,64	2,33 / 3,10	2,87 / 3,5
Heating capacity ² (kW) Nominal / Max	1,71 / 2,40	2,08 / 2,64	2,31 / 3,05	2,75 / 3,5
