

Is housing data fit for purpose to drive Net Zero actions?

Andy Flook, Sava

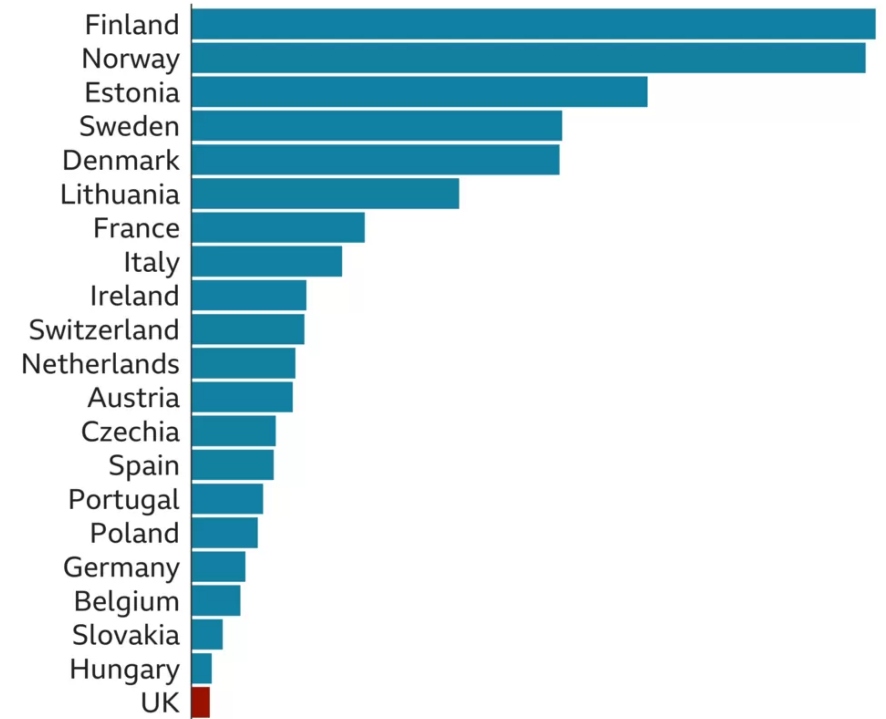

Introducing Sava

- ✓ 40 years supporting Housing Providers with energy analysis
- ✓ 240 Housing Provider customers
- ✓ Over 3,000,000 properties reported on each year
- ✓ Integrated with major asset management systems

Heat pumps in Europe

Number of installations in 2021 per million population

Establishing a Data Baseline

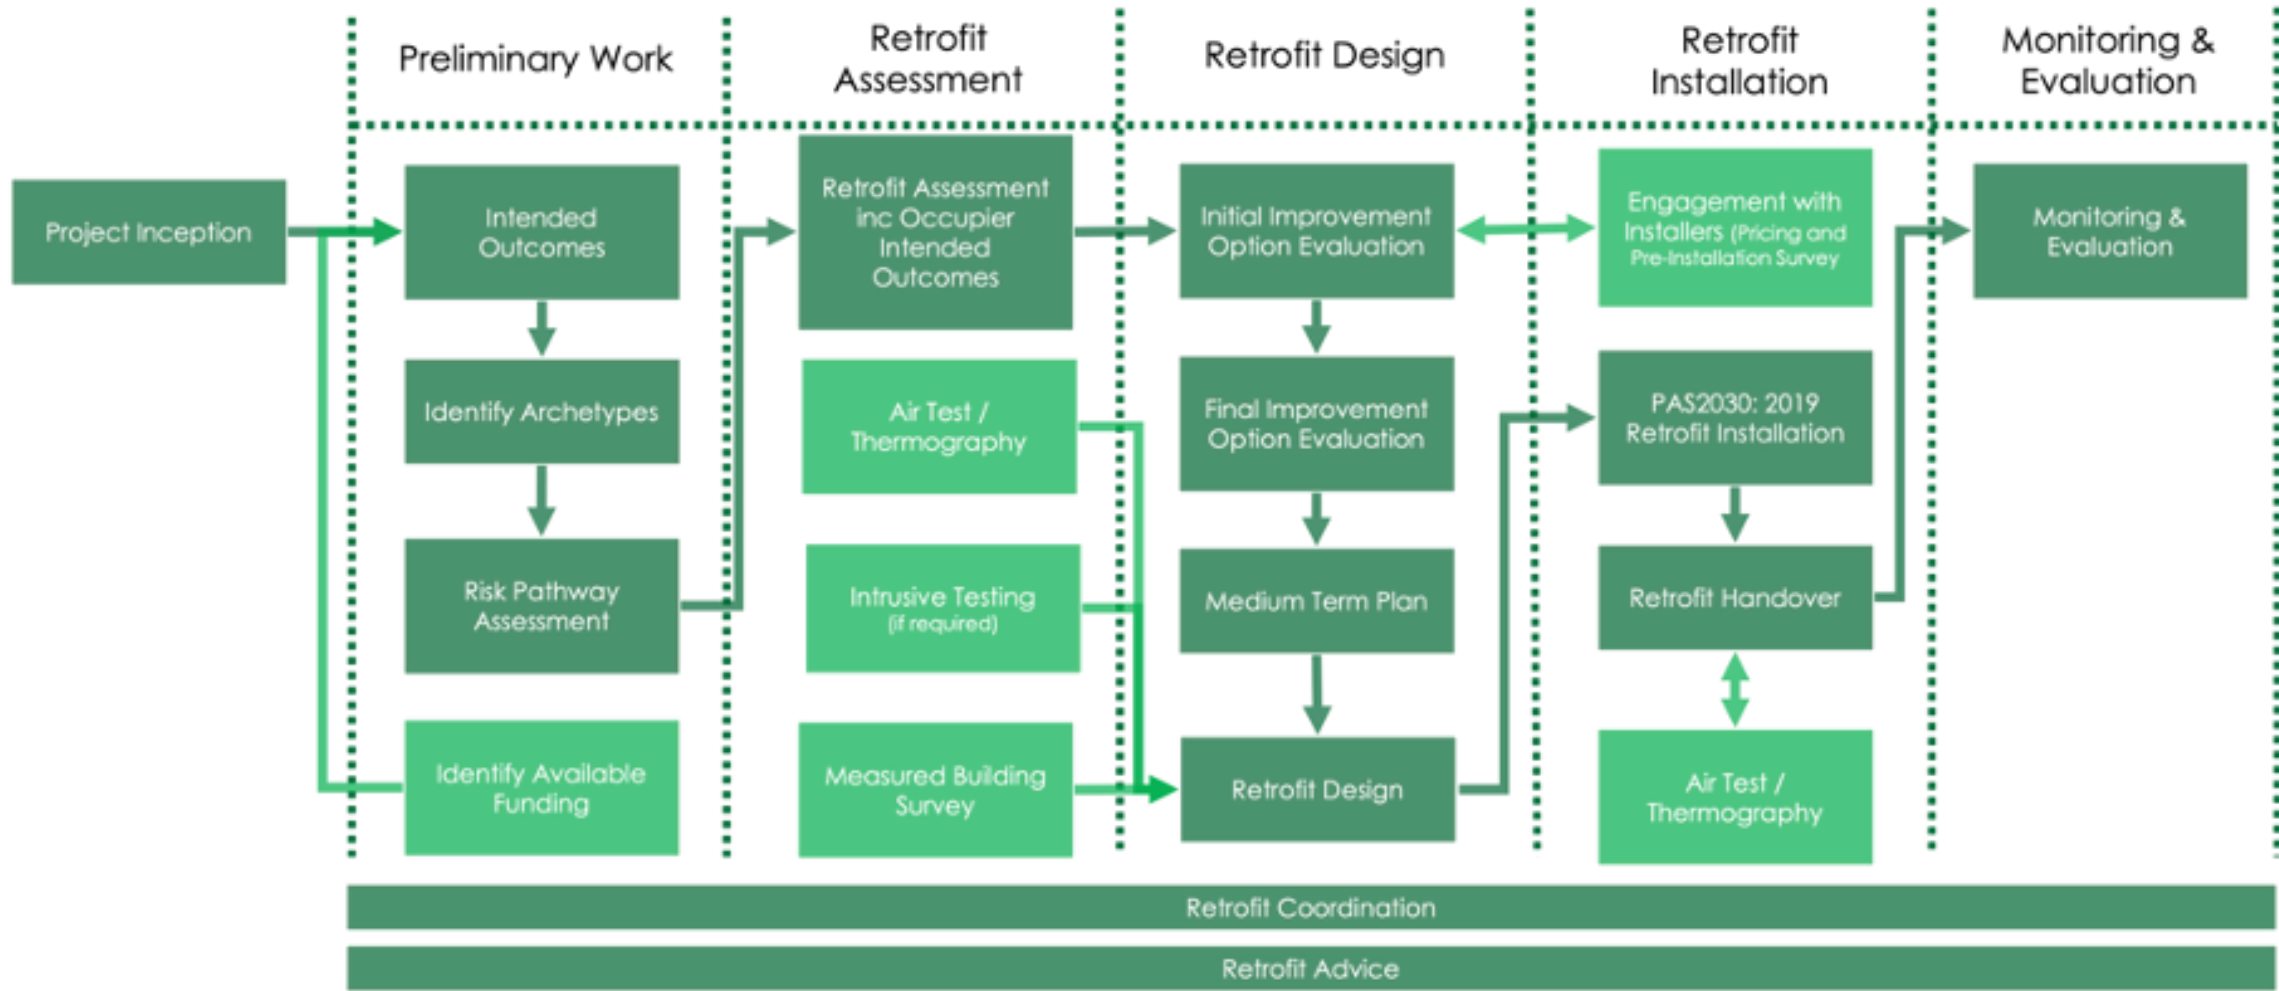

- ✓ **What level of confidence do you have in your data?**
- ✓ **Do you have a number of data sources you need to consolidate?**
- ✓ **Can you establish a data hierarchy?**
- ✓ **Do you have an energy rating for all of your stock?**

Single Version of the Truth

Considerations/questions to take away from the session

Do you have an energy/ carbon rating across your stock?

Are you capturing high quality data for your asset management system?

Do you have PAS2035 appreciation/expertise within your organization?

Have you 'squeezed the juice' from previous capital investment?

Does your organization have knowledge of what 'Retrofit', 'Net Zero' really means?
